

Elisha Adeniran - Cybersecurity Professional

Lagos, Nigeria | +2349119230875 | elishaadeniran05@gmail.com

LinkedIn: <https://www.linkedin.com/in/elisha-adeniran-29966833b/>

Professional Summary

Passionate and detail-oriented ethical hacker and cybersecurity professional with proven skills in penetration testing, ethical hacking, and vulnerability assessment. Adept at identifying threats, securing systems, and developing robust solutions to safeguard digital infrastructures. Proficient in advanced tools, frameworks, and scripting to enhance system resilience.

Skills

- Penetration Testing & Ethical Hacking: Expertise in ethical hacking techniques using tools like Kali NetHunter, proot, and Toshiba34 cyber drones.
- Programming & Scripting: Advanced proficiency in Python for automation and exploit development.
- Cybersecurity Tools: Hands-on experience with ADB exploitation, HTTP vulnerability analysis, and Hack the Box challenges.
- Web Development: Skilled in Flask-based development for professional cybersecurity portfolios.
- Networking: Strong knowledge of TCP/IP protocols, port scanning, and network security principles.
- Certifications: OSCP, CEH, CompTIA Security+, CISSP (Completed).
- Soft Skills: Analytical thinking, attention to detail, and problem-solving under pressure.

Professional Experience

Freelance Ethical Hacker (2022 - Present)

- Conducted in-depth penetration tests using advanced tools and techniques to identify vulnerabilities.

- Utilized Python scripts to automate scanning and exploit testing on Android devices.
- Successfully tackled Hack the Box challenges, including 'VICE,' honing exploitation skills.

Cybersecurity Portfolio Developer (2023 - Present)

- Designed a Flask-based cybersecurity portfolio featuring dynamic UI, interactive dashboards, and social media integrations.
- Showcased key projects and certifications to enhance professional visibility.

Telesales Agent (The Alliance Insurance Company - 2024)

- Scheduled appointments for in-house leads, demonstrating exceptional organizational and communication skills.

Certifications

- OSCP (Offensive Security Certified Professional) - [Completed/Expected Date]
- CEH (Certified Ethical Hacker) - [Completed]
- CompTIA Security+ - [Completed]
- CISSP (Certified Information Systems Security Professional) - [Completed]

Education

[Degree or Certification in Cybersecurity/IT] - [Institution Name], [Graduation Year or Expected Year]

Projects

Hack the Box: VICE Challenge

- Created a Python script to exploit Android devices via ADB and HTTP vulnerabilities.
- Diagnosed and resolved connectivity issues, increasing exploit success rates.

Kali NetHunter Minimal on ARM Devices

- Installed and configured Kali NetHunter Minimal on ARM-based devices using Termux.
- Overcame proot challenges to establish a stable pentesting environment.

Achievements

- Developed innovative tools for penetration testing simulations.
- Successfully resolved critical vulnerabilities during ethical hacking projects.

Languages

- Python: Advanced
- Bash: Intermediate
